

Maths Quiz at Droylsden Academy

7th December

There are teams of 10 children with 2 from Droylsden Academy in Year 7 and 4 children from Year 5 and 6. There are various rounds of questions from word problems, mental maths to making a football out of pentagons and hexagons. The actual name for this shape is a truncated icosahedron.

The final round is in the atrium with questions on the buzzer.

We are improving with each quiz. We got bronze this time.
